UW300 Unwinder & RW300 Rewinder

UW300

RW300

The Afinia Label UW300 Unwinder and RW300 Rewinder are the ideal partners to many digital label printers, where the included winders cannot meet the requirements of a more demanding job.

The UW300 and RW300 use uprated motors to ensure that heavier rolls can be handled with ease. The RW300's user-controlled clutch allows for roll tension to be adjusted easily, allowing narrow labels to be rewound precisely without excessive tension that normally causes print errors. The maximum roll diameter of 300mm allows for a longer uninterrupted workflow, delivering labels directly onto a roll ready for application.

The UW300 and RW 300 can be used independently or as a complete roll to roll system.

UW300 & RW300 SPECIFICATIONS	
Maximum Roll OD	300mm (11.8")
Maximum Media Width	240mm (9.4")
Maximum Speed	51rpm
Core Size	76.2mm (3")
